

## 2K Manufacturing Limited

Following on from the completion of the Replas report, a project in which Environmental Recycling Technologies plc (“ERT”) partnered with Brunel University, Bovis Lend Lease, Tesco plc and other partners and in which it was concluded that it is feasible to create new, viable products using ERT’s Powder Impression Moulding (“PIM”) Process, ERT signed a new worldwide licence with 2K Manufacturing Limited (“2K”) in December 2009 to manufacture a range of flat-board products, using the PIM Process.

2K are currently successfully manufacturing and selling a range of PIM flat-board products made from recycled plastics through a network of distributors. 2K operates a modern 62,000 square foot manufacturing facility, close to Luton Airport, producing flat-board products from their automated PIM line.

Primarily, 2K is marketing a plywood alternative called Ecosheet which can be used for hoarding and shuttering. Their leading products are –

- EcoSheet eSite Hoarding Panels
- EcoSheet eSite Display Panels
- EcoSheet eForm 25 Formwork Panels

Ecosheet has been recognised as a leading alternative to plywood and has won a number of building and innovation awards.

For more information on 2K and Ecosheet please visit their website at [www.ecosheet.com](http://www.ecosheet.com)
